SPECIMEN PLANT IN 5" POT

SUNRISE was awarded "Special Merit" rating in the New York Florist Club variety test at the New Jersey Experiment Station and given an Award of Merit as a pot plant by the New Jersey Florist Association.

New Bedding Petunia SUNRISE

Developed by Rutan Bros., New Market, N. J.

"All the world has been waiting for SUNRISE" is an exaggeration but the search has been world-wide for a compact yet vigorous, brilliant pink bedding Petunia.

SUNRISE answers these qualifications better than any we know. The growth is very compact and branching, attaining at maturity a height of 10-12" and a spread of 15-18". At no time does the plant become "leggy" but always presents a solid mass of deep green foliage studded with blooms.

The 2" flowers have slightly frilled edges and are brilliant rose with a flush of scarlet radiating from a small yellow throat, a combination that glows in the sunlight.

SUNRISE is excellent to use as a pot plant in early Spring and will sell readily in competition with the more difficult large flowered sorts.
